

Banknote Recycler for Retail Back Office

RZ-50

RZ-50 is a self-service banknote recycling machine for back office at retail outlets and supermarkets etc. RZ-50 automates the collection and verification of the cash revenue.

Optimises back office cash handling

RZ-50 counts and verifies the deposit immediately in the back office of the retail store. Cashiers deposit their cash revenue by themselves into RZ-50 and the result is verified immediately. Part of the deposited banknotes can be re-used and dispensed for the next day small change.

Optimises cash processing at CIT companies

The processing time of deposits from retail outlets is dramatically reduced, since the banknotes are stored in a large cassette instead of in a huge number of envelopes or bags. The processing time for deposits from retail outlets is reduced even further, as the deposits have already been verified back office at the retailer.
