

SCAN COIN 1510 Euro Value Currency Counter

 **SCAN COIN**

The SCAN COIN 1510 Euro Value not only counts the banknotes, it can also display the total value of them. It provides unique and advanced technology for helping you fight counterfeit euros.

Take on the cheats!

Every year hundreds of thousands of suspected counterfeit euro banknotes are withdrawn from circulation. The counterfeit notes have varied in quality from low and easy to detect to relatively expertly printed versions. SC 1510 Euro Value is especially developed for the European market and the increasing counterfeit problems.

Superior accuracy

With the greatest accuracy available, the SC 1510 Euro Value has proved to be an unbeatable choice for counting the value of banknotes at the same time as detecting counterfeits. The SC 1510 Euro Value can either count one denomination at a time or a bundle of mixed notes. You can choose to display the total value of the whole batch or the number of notes per denomination (split total).

Competitive performance and price

Many standard features, normally only available on larger and more expensive counters, are included as standard and offer excellent value for money.

MT euro specific counterfeit detector

SC 1510 Euro Value features unique and revolutionary metal thread (MT) technology from SCAN COIN. This advanced technique enables the machine to scan the metal thread in each banknote, which provides extremely high accuracy, both in terms of checking authenticity and summing up the correct value.

Advanced size detection

SC 1510 Euro Value provides size detection of the height of the notes as standard. The size can be adjusted by the operator between three and eight mm. A smaller banknote or other document is immediately detected to avoid miscounts.

High throughput with flexibility

The SC 1510 Euro Value offers a high throughput of up to 1,500 notes per minute. Counting speed can easily be modified via the front panel to one of four rates. Standard functions include continuous counting as well as variable batching of any quantity between 1 and 999 notes. The machine restarts automatically after each completed batch to maintain high throughput.

Ultraviolet and Infrared counterfeit detection

Using sophisticated UV and IR detection system, SC 1510 Euro Value examines the paper quality for counterfeits. The sensitivity of the detection can be adjusted in eight steps by the operator, or switched off when not required.

Designed for integration

An RS 232 interface is also provided as standard for connection to a PC, the Cash Centre System – CCS, and the Cash Management System – CMS.

User friendly design and functions

The functional design of SC 1510 Euro Value ensures a high level of user friendliness. As it weighs only 5.7 kg (12.6 lbs), it is easy to move between different locations using the built-in carrying handle.

Many versatile options

But what if your company does not only handle euro banknotes? The SC 1510 Euro Value works fine as a standard currency counter (i.e. no value counting) for other currencies than the Euro when using the "other currencies mode". In this case, the security features IR, UV and MT are used to detect the authenticity of the notes. SCAN COIN offers a wide range of currency counters. Contact us and we will help you find the best solution for your needs.

STANDARD FEATURES

UV	ultraviolet counterfeit detection
IR	multiple channel infrared counterfeit detection
MT	unique, advanced metal thread technology from SCAN COIN
IP	automatic selection of paper density and size
DD	size detection (height - short side)
DE	checking paper density
RS 232	interface connection for PC and SCAN COIN Cash Centre System and Cash Management System

TECHNICAL SPECIFICATIONS

WIDTH / DEPTH / HEIGHT	270 mm/10.6"/ 250 mm/9.8" / 230 mm/9.0"
NET WEIGHT	5.7 kg/12.6 lbs
MIN. DOCUMENT SIZE	110x50 mm/4.33x1.97"
MAX. DOCUMENT SIZE	185x90 mm/7.28x3.54"
SPEED RANGE	800/1,000/1,200/1,500 notes/min.
INPUT HOPPER CAPACITY	500 new notes
OUTPUT STACKER CAPACITY	200 new notes
POWER SUPPLY	99-245 V, 50/60 Hz
POWER CONSUMPTION	40 W
FEED SYSTEM	Friction

Founded in 1966, SCAN COIN is one of today's leading suppliers of cash processing equipment, system solutions and services. Our worldwide customer base is served through a network of SCAN COIN companies and distribution partners covering some 120 countries. SCAN COIN develops, manufactures and markets equipment and integrated solutions for handling banknotes and coins, and has become a world leader in the automatic cash processing market.
