

SCAN COIN 1510 Euro Currency Counter

 **SCAN COIN**

The SCAN COIN 1510 Euro currency counters provide unique and advanced technology for detecting euro banknotes.

Take on the cheats!

Every year hundreds of thousands of suspected counterfeit euro banknotes are withdrawn from circulation. The counterfeit notes have varied in quality from low and easy to detect to relatively expertly printed versions. The SC 1510 Euro is developed for the European market and the increasing counterfeit problems.

Competitive performance and price

Many standard features, normally only available on larger and more expensive machines, are included as standard. With the SC 1510 Euro you get a competitive currency counter that offers excellent value for money.

MT euro specific counterfeit detector

The SC 1510 Euro features unique and revolutionary metal thread (MT) technology from SCAN COIN. This advanced technique enables the machine to scan the metal thread in each banknote, which provides extremely high accuracy.

Advanced size detection

The SC 1510 Euro provides size detection of the height of the notes as standard. The size can be adjusted by the operator between two and seven mm. A smaller banknote or other document is immediately detected to avoid miscounts. This advanced detection technology also reacts to half notes.

Ultraviolet and Infrared counterfeit detection

Using sophisticated UV and IR detection system, SC 1510 Euro examines the paper quality for counterfeits. The sensitivity of the detection can be adjusted in eight steps by the operator, or switched off when not required.

Designed for integration

An RS 232 interface is also provided as standard for connection to a PC, the Cash Centre System – CCS, and the Cash Management System – CMS.

User friendly design and functions

The functional design ensures a high level of user friendliness. As the machine only weighs 5.6 kg (12.3 lbs), it is easy to move between different locations using the built-in carrying handle. The SC 1510 Euro can be equipped with an optional external customer display enabling the customer to follow the counting without having to stay close to the machine.

High throughput with flexibility

The SC 1510 Euro offers a high throughput of up to 1,500 notes per minute. Counting speeds can easily be modified via the front panel to one of nine rates from 500 to 1,500 notes per minute. Standard functions include continuous counting as well as variable batching of any quantity between 1 and 999 notes. The machine restarts automatically after each completed batch to maintain high throughput.

Many versatile options

But what if your company does not work in the euro market?

The SC 1510 Euro works fine as a standard currency counter for other currencies. We can still help as SCAN COIN offers a wide range of currency counters in addition to SC 1510 Euro. Contact us and we will help you find the best solution for your needs.

STANDARD FEATURES

| | |
|---------------|---|
| UV | ultraviolet counterfeit detection |
| IR | multiple channel infrared counterfeit detection |
| MT | new, unique, advanced counterfeit detection technology from SCAN COIN |
| IP | automatic selection of paper density and size |
| DD | size detection (height - short side) |
| SP | three speed selection, via SET function (low, medium or high) |
| AD | counts the accumulated number of banknotes |
| RS 232 | interface connection for PC and SCAN COIN Cash Centre System and Cash Management System |

TECHNICAL SPECIFICATION

| | |
|--------------------------------|---|
| WIDTH | 270 mm/10.6" |
| DEPTH | 250 mm/9.8" |
| HEIGHT | 230 mm/9.0" |
| NET WEIGHT | 5.6 kg/12.3 lbs |
| GROSS WEIGHT (packed) | 7.0 kg/15.4 lbs |
| MIN. DOCUMENT SIZE | 110x50 mm/4.33x1.97" |
| MAX. DOCUMENT SIZE | 185x90 mm/7.28x3.54" |
| SPEED RANGE | High: 1,300, 1,400, 1,500 notes/min. Medium: 900, 1,000, 1,100 notes/min. Low: 500, 600, 700 notes/min. |
| BATCH STOPS | Pre-set at 100 plus variable at 1-999. |
| DISPLAY | LCD |
| INPUT HOPPER CAPACITY | 500 new notes |
| OUTPUT STACKER CAPACITY | 200 new notes |
| POWER SUPPLY | 99-245 V, 60/50 Hz |
| POWER CONSUMPTION | 40 W |
| FEED SYSTEM | Friction |

Founded in 1966, SCAN COIN is one of today's leading suppliers of cash processing equipment, system solutions and services. Our worldwide customer base is served through a network of SCAN COIN companies and distribution partners covering some 120 countries. SCAN COIN develops, manufactures and markets equipment and integrated solutions for handling banknotes and coins, and has become a world leader in the automatic cash processing market.
