

SCAN COIN Active 2200 Coin Sorter

 **SCAN COIN**

If you thought your cash processing operation was as efficient as possible, think again. The SC Active 2200 coin sorter is a problem-solving machine with the high-speed precision and flexibility to meet and exceed the most stringent demands for accuracy, reliability and productivity. The SC Active 2200 is a software-controlled coin sorter based on the Active Sorting® concept.

Dynamic processing

What does Active Sorting® mean in practical terms? It means a machine that carries on working even when a coin bag is full, accurately decides the right outlet for a coin in microseconds and is easily programmable to fulfil your current or future processing needs. SC Active 2200 has been especially designed for flexible sorting of currencies, separately or simultaneously, making it suitable for highly demanding coin sorting. Active Sorting® boosts staff efficiently by freeing the operator to spend more time on other tasks.

Activate flexibility

The SC Active 2200 enables you to easily adapt your coin processing operation to changing needs - it can count/sort up to 63 different denominations of four different currencies. And, with 9 outlets plus one reject outlet, it offers great flexibility for sorting destinations.

The non-stop machine

When a traditional sorter stops for a bag switch, productivity falls by 100%. With the SC Active 2200, productivity falls some 10% – coins re-circulate and the other eight bags operate as normal. A new bag is attached and productivity returns to 100% without interruption.

Clear display: Screen format can be easily adapted to show just the information you require.

Adjust to size: The machine can be adjusted to suit the size of your packaging solution.

Inside the SC Active 2200 is the advanced software and superior sensors necessary to track each coin individually, identify the correct outlet and deposit it there - all in split second.

Take control: Software-controlled function keys make operation easy.

For example, the machine can sort national currency denominations to 8 outlets and a foreign currency denomination to the ninth. In fact, you can allocate any denomination to any bag and each denomination can be allocated to several bags.

Integration

The SC Active 2200 is designed to be at the heart of a flexible coin handling system. SCAN COIN offers a wide range of coin handling products, such as coin lifts, conveyors, coin wagons, cash managing software and verifying equipment, that all integrate with the SC Active 2200. These products can be combined in a system built around the SC Active 2200 to create a complete coin handling solution tailor-made to your needs.

Add-ons and alternatives

A range of options and accessories further enhance the customisation of the SC Active 2200 to your needs, and make life easier for the operator.

TECHNICAL SPECIFICATIONS

WIDTH	520 mm / 20.5"
DEPTH	640 mm / 25.2"
HEIGHT (table top)	480 mm / 18.9"
HEIGHT (floor stand)	1,050 mm / 41.3"
WEIGHT	37 kg / 81.5 lbs
VOLTAGE	100-130 VAC, 60 Hz 200-240 VAC, 50 Hz
POWER	100 W
SPEED	Up to 2,300 coins/min.
DIAMETER RANGE	14-38 mm / 0.55-1.5"
THICKNESS RANGE	0.9-3.5 mm / 0.04-0.14"
SERIAL INTERFACE	RS 232
HOPPER CAPACITY	4 litres
BOX VOLUME	Up to 1.3 litres
USER INTERFACE	Large LCD 320 x 240 pixels 5 software keys

Founded in 1966, SCAN COIN is one of today's leading suppliers of cash processing equipment, system solutions and services. Our worldwide customer base is served through a network of SCAN COIN companies and distribution partners covering some 120 countries. SCAN COIN develops, manufactures and markets equipment and integrated solutions for handling banknotes and coins, and has become a world leader in the automatic cash processing market.
