

SCAN COIN CCS Cash Centre System

If your company manages large quantities of cash, you know how complex cash management is. Cash management involves many time-consuming events and phases. Each can slow you down, immediately or later on. What's more, the process has traditionally been reliant upon manual events and data entry. These typically result in low operational efficiency, increased errors and heightened risks for embezzlement.

There is no off-the-shelf, one-size-suits-all solution. However, SCAN COIN CCS offers a truly flexible approach for controlling and optimising your workflow, especially designed for the European market.

Accuracy and control

SCAN COIN cash management software offers you seamless integration and monitoring. Employing a combination of bar code technology and SCAN COIN software, you ensure security over your clients' deposits at all times. Whenever a deposit is sent between operators and/or departments, different stamps are set which enable a full audit trail. This further safeguards against embezzlement.

Flexibility

The open, scalable design of SCAN COIN software allows you to choose the specific applications and work flows you require today, then upgrade your functionality as your needs change.

Together, we can build your software to meet your needs by choosing from CCS's nearly 150 individual application modules. SCAN COIN software can be used as a central database for multiple branches or locally at several branches. All data can be reached from one central point and the local branch can serve up to 200 workstations.

Efficiency

Automating more events means you involve fewer operators in your process. Also, utilising integrated data management and monitoring capabilities help you boost efficiencies throughout your operations. And through SCAN COIN's cash processing software you can automate recording and status of events. All this saves you time and effort in gaining a complete overview of client deposits.

All SCAN COIN cash management hardware and software can be integrated with your existing cash processing equipment – no matter which vendor made them. This offers further returns on investments by prolonging the useful service life of your current cash processing and cash management solutions.

TECHNICAL SPECIFICATIONS

Operating system	MS Windows 98, 2000 or XP
Standard PC	512 MB RAM
Standard server	1024 MB RAM
Network connection	Ethernet 100 Mb/s / 1 Gb/s
Auxiliary equipment	Keyboard, mouse, hand-held barcode scanner, printer
Database	MS SQL
Programming language	C++

Founded in 1966, SCAN COIN is one of today's leading suppliers of cash processing equipment, system solutions and services. Our worldwide customer base is served through a network of SCAN COIN companies and distribution partners covering some 120 countries. SCAN COIN develops, manufactures and markets equipment and integrated solutions for handling banknotes and coins, and has become a world leader in the automatic cash processing market.
