Coin Handling Equipment

Coin Lifts SC 93420 and SC 93500

Coin lifts for feeding loose coins from a hopper to any kind of coin sorting, coin counting or coin packaging machine.

Available with sensor control or directly started from the coin counter or coin sorter (for example the SC Active 4000).

The lifting belt has flights made of wear-resistant stainless steel.

The vertical part has a transparent plastic cover which prevents coins from falling off and makes the transport easy to supervise. For personal safety the machine stops automatically if the operator tries to reach a coin while the machine is running.

The complete unit is equipped with wheels to make it easy to move, for good access when servicing.
