
SCAN COIN Connect CDS Monitoring Software

When should your CDS machines be serviced? What's the ideal coin collection interval?

SCAN COIN Connect CDS – a new tool for keeping track of CDS units' status – gives you the answers.

SCAN COIN Connect CDS: keep track, stay efficient

Identifying the right servicing and collection frequency is a decisive factor in the cost-effective operation of CDS. With Connect CDS, you have an overview of all your CDS installations from one location, enabling you to schedule servicing and collection for maximum efficiency.

Status-seeking software

The Connect CDS software receives, interprets and displays signals sent by the connected CDS units.

A CDS can be connected to the network either on-line, by dial-up modem or via a wireless network.

Signals from the CDS units register events, such as deposits, a switch to supervisor mode, or when coin intake has reached a certain level.

It is also possible to actively track the situation at specific units. You can at any time, or at scheduled intervals, check the status of one, several, or all CDS units via the software.

Flexible monitoring

- Add CDS units to your monitored network.
- Edit information about added CDS units.
- Schedule automatic status checks.
- View the status of connected CDS units.
- Carry out "ad hoc" status checks, on a single unit or all units.
- Show statistics on screen for a selected CDS and selected period.
- Generate column charts for uptime, fees collected and number of deposits.
- Print paper reports.

Key benefits

Superior overview – Your company can monitor the activities of all your CDS units from one location.

Better planning – The software alerts you when the coin level in the boxes is high or the level of receipt paper is low, making it easier to plan optimum servicing and coin box collection.

Maximised availability – Error notices displayed by the software will help reduce the machine's downtime as the necessary servicing can be rapidly provided.

COMPUTER SPECIFICATIONS

| | |
|-------------------------|---|
| COMPUTER | Personal computer with an Intel Pentium 233-MHz or faster Processor (Pentium III recommended) |
| MEMORY | 128 MB of RAM or greater |
| HARD DISK | 130 MB of available hard-disk space |
| DRIVE | CD-ROM or DVD drive |
| DISPLAY | Super VGA (800X600) |
| OPERATING SYSTEM | Microsoft Windows 2000 with service pack 4 (SP4), Microsoft Windows XP, or later |

OPTIONS

| | |
|------------|------------------------------|
| LAN | Communication using TCP/IP |
| WAN | Communication using GPRS/GSM |
| WAN | Communication using MODEM |

Founded in 1966, SCAN COIN is one of today's leading suppliers of cash processing equipment, system solutions and services. Our worldwide customer base is served through a network of SCAN COIN companies and distribution partners covering some 120 countries. SCAN COIN develops, manufactures and markets equipment and integrated solutions for handling banknotes and coins, and has become a world leader in the automatic cash processing market.
